

ABOUT ME

As a seasoned Web Developer with 10 years of experience, I specialize in crafting and nurturing modern, functional, and responsive websites. My passion lies in transforming client visions into digital realities, ensuring their ideas are not just implemented, but brought to life in the most effective way possible. I look forward to bringing this dedication and expertise to your team.

WHAT MY CLIENTS SAY...

"Eric is a developer you can trust. Thinks along, can communicate well and quickly and is also very skilled. We are happy that we are working with Eric and will continue to do so in the future. We have been working with Shopify for 3 years now and Eric builds the entire website according to all our wishes."

Tim

CEO, Four Editors
foureditors.com

"We agreed on building our company website on WordPress but instead he built it on React to make it more faster and intuitive. Excellent work and very professional. The end product exceeds my expectations. ""

Alex Blastique

Operations Manager, Neuftech
neuftechph.com

"Eric has been amazing to work with. Very professional and highly skilled at his craft. I will try to work with him again for any needs in the future."

Matt Gramer

CEO, Kentucky Counseling Center
kentuckycounselingcenter.com

"Eric did a great job developing my website for me and I was extremely impressed with the results. Anything I have asked of Eric he has been able to do and clearly has lots of experience and knowledge. He clearly has a passion for what he does, and it shows in his work. I will definitely be using Eric again and highly recommend him to anyone that is after high quality work."

Travis Holvey

CEO, Kalopsi Watch Store

shopify redesign

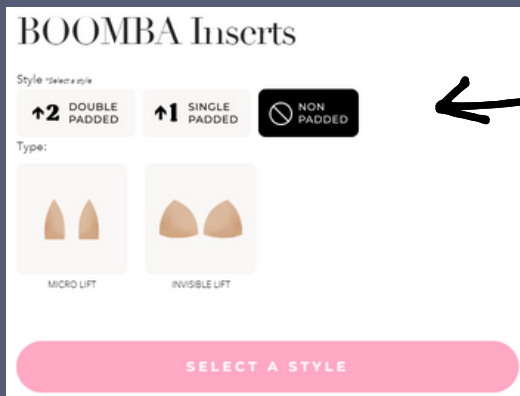

Custom Category Menu

Using special icons, I built a custom category menu on smaller screen size. This helps the user's browsing experience on tablets and mobile phones.

Custom Calculator

I built a special calculator to help users identify their bra size. This solves a problem for new customers on our website thus helping to decide on their purchase.

Variant Grouping

I built this app to simplify the selection between different product groups. This creates an improved user experience to browse different variants on a particular category.

Landing Page Calculator

Aside from the calculator, I built a special landing page specifically built for inquiries to help users identify their exact size.
